

hallucination of dependency single language checker

- 1.dependency tree (recursively)
- 2.latest m versions
- 3.nearest n versions

$$V_{\text{check}} = \underset{v \in V}{\operatorname{argmax}}^{(m)} v \cup \underset{v \in \{u \in V \mid [u_a] = x\}}{\operatorname{argmin}}^{(n)} \|v - v_0\|_2$$

```

(base) cc@eamin:~/SWEGENT-BENCH/source/tools$ python -m compat.package_version
<frozen runpy>:128: RuntimeWarning: 'compat.package_version' found in sys.modules after import of package 'compat', but prior to execution of 'compat.package_version'; this may result in unpredictable behaviour
